2024 Membership Dues

We're better together!

SHSC members can also pay their annual dues online using a credit card. While this may be more convenient for some organizations, SHSC is charged a 3% fee when you pay this way. *Since we assume you intend for SHSC to receive your full dues, please add 3% to cover the cost of using a credit card if you use this online option. Thank you!*

You can avoid the 3% fee by printing out this dues invoice and mailing a check. Either way works. Options are good!

SEATTLE HUMAN SERVICES COALITION

“An Assertive and Unified Voice Helping People Shape Public Policy to Meet Basic Human Needs in Seattle and King County, Washington.”

The Seattle Human Services Coalition (SHSC) was formed in 1987 to ensure that nonprofit human service providers have a unified voice to advocate for meeting basic human needs. Through 35 years of advocacy and collaboration, local public investments in human services have gone from zero to \$240 million a year in City of Seattle, plus over \$180 million a year in funding from King County. Decades of steadfast advocacy across the human service sector led to this degree of local investment and support for building well-being in our communities.

Today, SHSC continues this history of community-based advocacy. A multi-cultural coalition of over 200 human service agencies, SHSC organizes our members around issues like racial justice and wage equity to support a thriving nonprofit human service sector. Our member coalitions represent organizations dedicated to shaping public policy on issues like ending homelessness, hunger, domestic violence prevention, quality early childhood education, health care, issues affecting elders and the development of children and youth.

You can read more about our policy priorities [here](#).

What we do:

- **Coordinate education and advocacy to support local budget and policy decisions that help people reach their full potential.** SHSC members work together to monitor City policies, identify shared positions, and educate policy-makers on the impact of current issues such as public safety, racial equity, and funding priorities on our communities.
- **Continue to build on the success of our wage equity campaign.** SHSC secured funding from the City of Seattle to commission a study of nonprofit human service sector wages. The [2022 study from the UW School of Social Work](#) found that King County human service workers are paid at least 37% less than workers with comparable skill sets in other industries. This data has sparked action at the City of Seattle, which in 2023 dedicated \$5.1M in additional funding for wage increases. It also inspired King County to dedicate over \$70M in additional workforce development funds over the next several years. We are grateful for the progress made and look forward to continuing to engage providers, funders, and community members on this topic.

- **Develop support for stable, adequate funding for human services.** SHSC members connect with providers, allies, and local government officials to support increased local investment in community health and human services. Our members fight for the fair allocation of resources needed to support everyone in this great city.
- **Strengthen SHSC members' abilities to work collaboratively.** SHSC provides logistical and capacity support to its member coalitions. As a coalition of coalitions, SHSC strives to support each facet of the human service sector in addressing their unique needs and challenges. SHSC relies on funding and engagement from each of our member coalitions to be successful.
